March, 1977

SUBJECT:

FRONT AIR DAM

MODELS:

1977 TR7

The 1977 TR7 is equipped with a front air dam which is secured along the front of the car, beneath the air intake.

This air dam assembly will be stowed in the trunk of the vehicle and should be installed by your dealership upon receipt of the car. It is considered part of the normal P.D.I. operation; the installation taking approximately 3 to 5 minutes.
