February, 1977

SUBJECT: AUTOMATIC TRANSMISSION KICKDOWN
CABLE

MODELS:
Automatic TR7

The 1977 TR7 is equipped with a kickdown cable, part #TKC 3760, which is different from that which is fitted to the 1976 model year, part #88218009.

The 1977 cable is 44.25 inches long whereas the 1976 cable is 35.63 inches long.

The presence of a blue paint mark on the torque converter housing will identify a vehicle equipped with the longer cable (i.e. 44.25 inches long). The gearbox number at which the change was implemented is 0273381. It is important to note that earlier vehicles, i.e. 1976 model year vehicles, should be serviced with the shorter cable (35.63 inches long).
