ITEM T80/018

SUBJECT: OIL RECOMMENDATION 5 SPEED GEARBOX

MODELS: TR7, TR8

In instances of difficult engagement from first to second gear when cold, it is recommended that the gearbox oil be changed to automatic transmission fluid.

Shell Donax TF is being introduced into production gearboxes.

ATF fluids meeting specification M2C 33F may be used for refilling and for topping up gearboxes containing ATF which is readily recognizable by its red color.
